

AUT-114A-01 (LAB)

Assignment Two: Research Paper

Your assignment is to write a 3-5 page research paper:

Here are the Guidelines:

Name the three different types of harmful emissions that are given off by a running gasoline engine. You must also explain their harmful effects on the environment as well as humans.

In your paper you must discuss the following items:

- 1) What is the emission and how is it created?
- 2) How does the emission leave the vehicle and what are its effects on the environment and humans once it is in the atmosphere.

NOTE: Papers that are under 3 pages will not be accepted. NO EXCEPTIONS!!

Your paper must be typed in a "Times New Roman", size 12 point font and must also be double spaced. All sources used must be listed in a bibliography at the end of your paper. (The bibliography, does not count as one of the pages.)

You may use any source you like. Examples: Books, internet, personal interviews, etc. ALL SOURCES WILL BE VERIFIED!
***** Paper will be due the week prior to the end of the class. You will lose one (1) letter grade for every class period it is late. The paper will count for 1/2 your grade for AUT-114A
